DATA ANALYST HIGHLIGHTS

Data Analyst with 2+ years of experience transforming complex datasets into actionable business insights using SQL, Python, Tableau, Power BI, and Excel. Skilled in building automated dashboards, developing ETL pipelines, and applying statistical and machine learning techniques to solve real-world problems. Adept at collaborating across marketing, operations, and technology teams to translate data into measurable outcomes.

- Analyzed and modeled **100K+ records** across marketing, sales, and operational datasets to identify performance trends and improve ROI.
- Automated data cleaning and reporting pipelines in Python and SQL, reducing manual workload by **up to 40%**.
- Designed and deployed **20+ dashboards** and KPI trackers in Power BI and Tableau for real-time business insights.
- Experienced across the **end-to-end data lifecycle** - from extraction and transformation to visualization and stakeholder presentation.
- Presented key campaign performance insights to the **CMO and marketing team**, demonstrating a **10%** increase in engagement rates, leading to data-driven adjustments in strategy.

PROFESSIONAL EXPERIENCE

Deakin University

Burwood, VIC

Data Scientist

June 2022 - May 2023

- Developed a real-time heatwave risk simulation using OpenWeatherMap API and DBSCAN clustering to detect temperature anomalies across 30+ Melbourne suburbs; framework adaptable for operational risk monitoring.
- Created a biodiversity uniqueness dashboard by merging three public datasets, identifying 40+ unique insect species across 50+ locations using geospatial analytics.
- Delivered production-ready BI use cases analyzing 200K+ records on climate and biodiversity, improving dashboard refresh reliability by 20%.

One Media

Delhi, India

Senior Reporting Analyst

June 2022 - May 2023

- Managed end-to-end reporting and analytics for 10+ clients, analyzing **50K+** campaign data points to drive a 15% increase in engagement and an 8% reduction in CAC.
- Designed interactive Tableau dashboards with **15+ KPIs**, enabling real-time performance tracking for 10+ campaigns, leading to quicker strategic decisions and improved client satisfaction.
- Optimized A/B testing methodologies for 40+ marketing experiments, reducing customer acquisition costs by 8%.

Theia Enterprise Pvt Ltd.

Mumbai, India

Data Analyst

Oct 2021 - May 2022

- Built Power BI dashboards to track 8+ key metrics (sales, repeat rate, basket size, churn risk) across 20K+ transactional records.
- Utilized Excel functions like VLOOKUP, Pivot Tables, and Data Validation to streamline manual data processing, reducing time by **30%** across departments.
- Collaborated with stakeholders to translate analytics into process improvements, boosting productivity by **12%**.

PROJECTS

NLP-Based Log Classification System

- Developed an NLP-based model to classify log messages into categories, improving log analysis efficiency by 40%.
- Built and fine-tuned machine learning models (Logistic Regression, Random Forest) to classify logs with 85%+ accuracy.
- Enhanced feature extraction with TF-IDF and Word Embeddings (Word2Vec, FastText), hosted code on GitHub.
- Worked with Pandas and SQL to preprocess 50,000+ log records, improving query efficiency for log retrieval by 35%.

Credit Risk Analysis & Default Prediction (Python & SQL)

- Analyzed 100K+ loan records, including borrower demographics, loan amount, and payment history, to predict risk.
- Performed feature engineering (income-to-loan ratio, credit utilization, payment delays) and correlation analysis using SQL and Python.
- Trained and compared models (Logistic Regression, Random Forest), achieving an ROC-AUC score of 0.91.

EDUCATION

Deakin University, Melbourne, VIC

July 2023 - June 2025

Master of Science in Data Science

Coursework: Deep Learning, Modern Data Science, Maths for AI, Statistical Analysis, Database Fundamentals, Data Wrangling.

TECHNICAL SKILLS

- **Analytics & Visualization:** SQL (MySQL, PL/SQL, Oracle), Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau, Power BI, Excel (Macros, VBA, Pivot Tables, Lookup), Google Analytics 4, Looker Studio, Snowflake (via coursework).
- **Statistical & Machine Learning Methods:** Regression Analysis, Hypothesis Testing, Decision Trees, Random Forest, K-Means Clustering, Predictive Modeling, NLP.
- **Tools & Frameworks:** Agile Methodologies, Jira, Git, ETL Processes, Data Governance, AWS (S3, EC2), Azure Data Factory, Hadoop, Spark, Risk Management Frameworks.
