SUMMARY

Data Analyst with 2+ years of experience supporting business decision-making through reporting, dashboards, and data analysis. Strong background in SQL and Power BI, working with stakeholders across marketing, operations, and commercial teams to define metrics, analyse performance, and deliver actionable insights. Comfortable owning end-to-end reporting and translating business questions into clear, practical insights for non-technical audiences.

PROFESSIONAL EXPERIENCE

Chameleon - Smarter World

Melbourne, VIC

Data Analyst

June 2024 - May 2025

- Delivered end-to-end analytics in sustainability and environmental use cases, analysing 200K+ records from Melbourne public datasets and APIs using SQL and Python to support evidence-based decision-making.
- Built a biodiversity analysis dashboard by integrating three public datasets, using geospatial analytics to identify species distribution patterns across 50+ locations for environmental insight reporting.
- Presented insights to cross-functional stakeholders (5-15 members) in structured review sessions, improving clarity and alignment on data-driven decisions.

RSPCA Victoria

Melbourne, VIC

Data Analyst

June 2023 - Nov 2023

- Created Excel dashboards to monitor operational KPIs and unit costs per activity, enabling resource reallocation that reduced costs in underperforming areas by 15% while meeting service levels.
- Cleaned and standardised five months of multi-source data using SQL checks and conditional formatting, resolving 97% of anomalies and raising confidence in weekly performance reporting.
- Facilitated structured feedback loops with stakeholders, increasing dashboard adoption to 70% within eight weeks, and reducing one-off data requests by 28%.

One Media

Delhi, India

Data Analyst

June 2022 - May 2023

- Owned end-to-end reporting and analytics for 10+ clients, analysing 50K+ campaign performance records using SQL, Excel, and Tableau to support optimisation and client decision-making.
- Designed and maintained Tableau dashboards tracking 10+ KPIs (reach, engagement, conversion, ROI), enabling real-time performance visibility and faster optimisation cycles.
- Conducted A/B test analysis across 40+ campaigns, contributing to an 8% reduction in customer acquisition costs.
- Partnered with marketing and finance teams to integrate media spend, performance, and ROI data, improving profitability reporting accuracy by approximately 15%.

Theia Enterprise

Mumbai, India

Data Analyst

Oct 2021 - May 2022

- Delivered Power BI dashboards tracking sales, repeat purchase behaviour, basket size, and churn to support commercial and marketing decision-making across 20K+ customer transactions.
- Automated recurring reporting workflows using Excel (Pivot Tables, VBA, validation), reducing manual effort by 30%.
- Analysed CRM and transactional data to extract behavioural insights and support commercial stakeholder decision-making.
- Translated analytical findings into clear, business-ready action items, contributing to a 12% improvement in operational productivity.

PROJECTS

Woolworths Grocery Price Analysis - SQL, Python, MySQL, Tableau ([GitHub](#))

- Designed and implemented a full ETL pipeline using Python and MySQL to ingest and clean pricing data for 62 essential grocery items.
- Consolidated 5K+ raw price records into a structured daily_prices table to enable consistent time-series analysis.
- Analysed store-level price behaviour across multiple Woolworths locations, identifying week-to-week inflation trends and 18-25% price variation between stores to support comparative insights.

Climate Change Impact Simulation - Python, APIs, Geospatial Analytics ([GitHub](#))

- Developed a real-time heatwave and climate-risk simulation using the OpenWeatherMap API, processing **20K+** temperature readings across 30+ Melbourne suburbs.
- Applied DBSCAN clustering and geospatial techniques to detect anomaly patterns, identifying high-risk hotspots with **90%+** clustering accuracy.

EDUCATION

Deakin University, Melbourne, VIC

July 2023 - June 2025

Master of Science in Data Science - WAM : 75%

SKILLS

- Data Analysis & Reporting:** SQL (MySQL, Oracle, PL/SQL), Power BI, Tableau, Excel, Data Cleaning, Data Modelling, KPI Reporting.
- Insights & Analytics:** Python, Statistical Analysis, A/B Testing, Hypothesis Testing, Regression Analysis, Time-Series Analysis, K-Means Clustering, Forecasting.
- Tools & Platforms:** ETL Pipelines, API Integration, Git, Jira, Agile/Scrum, Scripts, AWS (S3, EC2), Snowflake.
